

**NEW!**

## CONTROL JOINT GROOVERS

Cutting control joints is a snap with our new streamlined groovers. Made from durable aluminum, these groovers feature a machined cutting nose on both ends as well as a sight tab to ensure a straight joint. Use our 12" single ended hand held model for cleaning up joint ends. Makes 1" deep joints; other depths are available as well. Attach our snap lock handle socket (sold separately) or use your own favorite adjustable bracket.

## SLAB CUTTER

Made from high strength alloy aluminum, our hard wearing slab cutters are available in two different blade depths to ensure 25% cut on concrete slabs up to 8" thick. Edges are flared out to prevent finish marring. Bi-directional.

BLADE DEPTH	PART NO.
1-1/8"	CWT-22 SC 118
2"	CWT-22 SC 200

LIGHTWEIGHT AND EASY TO HANDLE!

## ALUMINUM HAND GROOVERS

Made from 1/8" thick 6061-T6 hard-rolled tempered aluminum, our hand held groovers are great for smaller jobs and detail work. Both sizes are 8" long, with a replaceable blade 1-1/8" deep with a 3/8" radius. The blade is cut flush with the back edge of the float, allowing full depth grooving against a bulk head or form line.
